MEMORANDUM FOR:
SUBJECT : CCPC Activity Report

25X1

STUDIES PREPARED FOR THE USIB

Soviet Naval Weapons Threat (Anti-Ship Missile)

The CCPC prepared an all source study of the Soviet Anti-Ship Missile Threat taking into account current intelligence needs, priorities and capabilities. In approving the conclusions and recommendations the USIB assigned responsibility for monitoring actions being taken to improve overall intelligence on Soviet anti-ship missiles to the Guided Missile and Astronautics Intelligence Committee.

National Foreign Intelligence on Narcotics and Dangerous Drugs

The Committee has underway a study to determine the actions which can be taken within the intelligence community to furnish required intelligence support for law enforcement action planning with emphasis on the international aspects of the problem. Particular attention will be placed on the methods which can be developed to provide better information on those trafficking systems which manufacture and transport hard narcotics into the United States.

STUDIES PREPARED FOR THE DCI

South Asia Intelligence Contingency Planning

The Committee prepared a study to provide the DCI with an awareness of the capability of

the intelligence community to respond to user requirements for information concerning the confrontation in the event hostilities broke out between India and Pakistan. It also contained recommendations for actions that could be taken to improve the collection capability should it be necessary to do so. The DCI approved the recommendations and implementing instructions were issued to the appropriate agencies and departments.

The DCI has also requested the CCPC to update this study thereby advising him of the collection actions taken which are related to the recommendations in the study and to report on the adequacy of the collection effort and appraise the information needs and collection capability in light of the new situation that has emerged in South Asia. The Committee will publish this update in the near future.

Indian Ocean Area Intelligence Collection

This study, prepared in two parts, is closely related to the updating of the South Asia Intelligence Contingency Planning Study because they both deal with the Soviet presence in the area. However, this study focuses on the US capability to collect against the Soviet navy activity in the Indian Ocean area including the Bay of Bengal, Andaman Sea, Arabian Sea, Persian Gulf, Gulf of Aden and the Red Sea. It recommends actions that can be taken, at relatively little cost, to improve the intelligence coverage of the Indian Ocean area in keeping with the low priority accorded the area. (You may wish to list this under the USIB section if the Director approves your memo.)

Support of the NIRB

With the issuance of the President's Directive the NIRB was abolished and replaced by IRAC. This action has forced the CCPC to hold in abeyance the work that was in progress to support the NIRB (NSDM 112).
